

We have the pleasure to invite you to the

Sepsis Symposium

Alteco® LPS Adsorber Treatment for Patients with Life Threatening Sepsis

Time & Place

11th of October, 2010, 16.00-18.00 + Cocktail Buffet
Hotel Diagonal Zero, Plaça de Llevant s/n. 08019, Barcelona
(Just opposite the ECICM Congress, see map on next page)

Programme

Moderator:

*Professor Mikael Bodelsson, Dept. of Anesthesiology & Intensive Care,
Lund University, Sweden*

16.00 Welcome

Jonas Jönmark, President Alteco Medical AB

16.10 Clinical Experiences from LPS Adsorption in Cancer Patients with Severe Sepsis/Septic Shock

*MD, PhD, Elena Gromova, Head Dept. of Intensive Care and CRRT
Russian Cancer Research Centre, Moscow, Russia*

16.40 LPS Adsorber in Septic Shock: Observational Cohort Study

*Professor Tero Ala-Kokko, Head of Intensive Care Clinic
Oulu University Hospital, Finland*

17.10 Clinical Efficacy of Adsorption of LPS in the Treatment of Gram Negative Severe Sepsis

*MD, PhD, Vladimir Kulabukhov, Head of Dept. of Anesthesiology and Intensive Care
Purulent-Septic Surgery Clinic, Moscow, Russia*

17.40 Discussion & Summary

18.00 Cocktail Buffet

For further information, see next page

Place for the Symposium

11th of October, 2010, 16.00-18.00

You are very welcome!

For Alteco Medical AB,

Alteco Medical AB is a Swedish medical device company established in Lund in 2002.

Alteco Medical AB develops, manufactures and markets a unique medical device - the Alteco® LPS Adsorber - for use within the sepsis area. Sepsis is a complex and serious condition affecting several millions of patients each year. In its most severe form, septic shock, the mortality is in the range of 50%, making sepsis one of the leading causes of death.

The Alteco® LPS Adsorber is a class II medical device for the treatment of patients with suspected or verified gram negative sepsis or septic shock. Treatment with the adsorber will reduce the patient's blood levels of lipopolysaccharide (LPS, endotoxin); one of the most potent sepsis mediators.

The Alteco® LPS Adsorber was CE marked in 2005 and is now used in several leading clinics allocated in many countries, mostly in Europe.
